ABHISHEK SO J B

Software Engineer | Flutter & Backend-Integrated Application Development

abhishekjbri@gmail.com • +91 8299398980 • Gurugram, India

PROFESSIONAL SUMMARY

Software engineer with 2+ years of experience building and maintaining production applications end to end, from UI to REST API and cloud backend integration. Strong foundation in data structures, algorithms, OOP and DBMS, with working knowledge of C/C++, Java and Python. Experienced with real-time data synchronization, client-server communication over HTTP/REST, authentication, and payment and notification workflows. Comfortable owning modules and bug fixes independently, debugging production issues, and collaborating across cross-functional teams. Eager to grow into large-scale distributed systems and networking.

TECHNICAL SKILLS

Languages: Dart, Python, Java, C/C++

Core Computer Science: Data Structures & Algorithms, Complexity Analysis, OOP, DBMS

Backend & Networking: REST APIs, HTTP client-server communication, JSON, Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging, Node.js, Django/Flask

Databases: MySQL, MongoDB, Firestore

Application Development: Flutter, BLoC, Provider, React.js, Windows Desktop Automation (Python)

Tools & Practices: Git, Version Control, Debugging & Troubleshooting, Code Review

AI-assisted Development: GitHub Copilot, Cursor, Windsurf, Antigravity

PROFESSIONAL EXPERIENCE

Associate Software Engineer (Flutter)

Mar 2025 – Present

WSY • Gurugram

- Design, develop and maintain production applications end to end, covering UI, business logic and backend integration, and own smaller modules and bug fixes with limited oversight.
- Integrate REST APIs and Firebase services for authentication, payment processing and push notifications, handling data flow between clients and backend services.
- Apply BLoC and Provider state management to build scalable, maintainable, well-structured application architecture.
- Built a client-facing React.js dashboard that fetches and displays real-time data from backend APIs.
- Built a Python-based Windows automation tool that streamlines repetitive internal workflows.
- Debug and troubleshoot issues across application and API layers to improve stability and reliability of live features.
- Collaborate with cross-functional teams on feature delivery; use AI-assisted tools alongside manual coding and code review to speed up development and debugging.

Flutter Intern (UI/UX)

Aug 2024 – Mar 2025

WSY • Gurugram

- Translated design mockups into responsive, functional Flutter interfaces.
- Identified and fixed UI bugs, improving usability and consistency across screens.
- Worked in Git-based workflows with iterative feature delivery.

FEATURED PROJECTS

Loyalty Rewards App | *Flutter, Firebase, REST API*

Built an app where users scan QR codes to earn loyalty points and redeem rewards, including point-calculation logic and the claim/redemption flow.

Real-Time Chat App | *Flutter, Firebase*

Developed one-to-one messaging with real-time message synchronization and persistent storage using Firebase.

Weather Forecast App | *Flutter, REST API*

Integrated a live weather API, parsing JSON responses to show temperature, conditions and forecasts for searched cities.

EDUCATION

Master of Computer Applications (MCA)

2025

Gurugram University
